

InterMapTxt

This is the place for defining InterWiki prefixes

This page was modelled after the [?MeatBall:InterMapTxt](#) page. In addition, an optional comment is allowed after the mapping.

This page is interpreted in a special way by Trac, in order to support InterWiki links in a flexible and dynamic way.

The code block after the first line separator in this page will be interpreted as a list of InterWiki specifications:

```
prefix <space> URL [<space> # comment]
```

By using \$1, \$2, etc. within the URL, it is possible to create InterWiki links which support multiple arguments, e.g. Trac:ticket:40. The URL itself can be optionally followed by a comment, which will subsequently be used for decorating the links using that prefix.

New InterWiki links can be created by adding to that list, in real time. Note however that *deletions* are also taken into account immediately, so it may be better to use comments for disabling prefixes.

Also note that InterWiki prefixes are case insensitive.

List of Active Prefixes

| <i>Prefix</i> | <i>Site</i> |
|----------------------|---|
| <u>Acronym</u> | http://www.acronymfinder.com/af-query.asp?String=exact&Acronym= |
