Welcome to ALMOS Project

ALMOS (Advanced Locality Management Operating System) is a research operating system currently under development at the ?SoC department of the Laboratory ?LIP6 (?Université Pierre et Marie Curie in Paris).

This research operating system is targeting ?TSAR (Tera-Scale ARchitecture) a massively multiprocessors cc-NUMA which is clusterized and scalable architecture up to 4096 processors and 1 Terabytes of physical memory.

PROJECT WEBSITE IS UNDER CONSTRUCTION
