

# Using GDB

You may use GDB on your platform, replace your processor implementation by a GDB-wrapped one:

```
# Replace
hard.create( 'caba:iss_wrapper', 'cpu0', iss_t = 'common:mipsel', ident = 0 )
# by
hard.create( 'caba:iss_wrapper', 'cpu0', iss_t = 'common:gdb_iss', gdb_iss_t = 'common:mipsel',
```

Then you may use GDB [?wiki:Tools/GdbServer](#) on muteks/soft/bin.soft binary.
