

Here is a list of major contributors to the project (alphabetical order):

- *Matthieu Bucchianeri*: libnetwork, device drivers, initial Doom port
- *Alexandre Becoulet*: hexo, mutek, ibmpc/x86 port, soclib/mips port, libc, libpthread, libtermui, fs & device drivers...
- *François Charot*: Nios processor port
- *Eric Guthmuller*: numerous tests, bug reports and fixes.
- *Sylvain Leroy*: devFS, VFS-Interface for NFS (libnetwork)
- *Nicolas Pouillon*: libsrsl, libmwmr, libfdat, current libvfs, ppc and arm ports, many hexo changes, fs & device drivers...
- *Joel Porquet*: libelf, libdsrsl, libm, libtinygl, many fixes...
- *Dimitri Refauvelet*: virtual memory and memory allocation

Some peoples have contributed to older, no more available, modules:

- *Ghassan Amlaless*: the former libvfs and fs drivers, before revision 1254
- *Nicolas Ballabriga*: an early minimalist libvfs & libunix, before revision 561

The project has originally been developed by *Alexandre Becoulet*.
