Here is a list of major contributors to the project (alphabetical order):

- *Ghassan Almaless*: from-scratch VFS Sub-System (libvfs), FIFO, FAT32 file systems drivers and write-back full associative Buffer-Cache
- *Nicolas Ballabriga*: early minimalist libvfs & libunix
- *Matthieu Bucchianeri*: libnetwork, device drivers, initial Doom port
- *Alexandre Becoulet*: hexo, mutek, ibmpc/x86 port, soclib/mips port, libc, libpthread, libtermui, device drivers...
- *Sylvain Leroy*: devFS, VFS-Interface for existing NFS (libnetwork)
- *Nicolas Pouillon*: libsrl, libmwmr, libfdt, ppc and arm ports, many hexo changes, device drivers...
- *Joel Porquet*: librtld, libdsrl, libtermui, many fixes...
- *Dimitri Refauvelet*: virtual memory and memory allocation

The project has originally been developped by *Alexandre Becoulet*.
