

Unicode Support in Trac

Error: Macro TracGuideToc(None) failed

```
'NoneType' object has no attribute 'find'
```

Trac encodes all text using UTF-8, including text in tickets and wiki pages. Internal processing of text uses true Unicode representations. As such, it supports most commonly used character encodings.

If the default encoding in your source code repository is not UTF-8, you can specify it in your trac.ini file:

```
default_charset = gbk
```

Also ensure that your database stores its data in UTF-8, otherwise results may be unpredictable.

To convert your database to UTF-8, the easiest way is to create a dump of the database, convert it into UTF-8, for example using iconv, and then import it back into the database.

Examples

Arabic

???? ???? ???? ?? ??????? ?????????? ??? UTF-8? ??? ?? ??? ??????? ?????????? ?? ????? ?????? ???????.

Bulgarian

???????????? ???? ?????? ???

Česky

Čeština v kódování UTF-8, žádný problém.
